

## PREFACE

Journal of Wetlands Environmental Management is an international journal that publishes authoritative and original articles on topics relevant to freshwater, brackish and marine coastal wetland ecosystems. The Journal serves as a multi-disciplinary forum covering key issues in wetlands science, management, policy and economics. As such, Wetlands Environmental Management aims to encourage the exchange of information between environmental managers, pure and applied scientists, and national and international authorities on wetlands policy and ecological economics.

Journal of Wetlands Environmental Management encourages the exchange of information between environmental managers, pure and applied scientists, and national and international authorities on wetlands science, policy and ecological economics. The journal's unique **Wetlands Environmental Management** site provides free access to recent papers on the issues, methods and impacts of wetlands management - a particularly valuable resource for those involved in resource management and applied research.

Journal of Wetlands Environmental Management published by Lambung Mangkurat University in collaboration with [Peat Society of Indonesian](#) & [Indonesian Biochar Association](#)
